REGULATIONS FOR ORGANISERS

1. Each region/centre must enter at least two teams of ten: one Junior (Grades 8 and 9) and one Senior (Grades 10, 11 and 12), and may also enter B, C, D ... teams at each level. The score of teams with fewer than 10 members will be aggregated and **not** pro-rated.
2. Each regional/centre organiser selects the teams with the aid of appropriate transparent selection criteria. The 2nd round results of the South African Mathematics Olympiad may be used and can be obtained from the Project Manager - Herman Bosman, tel. 012 392-9316 or e-mail herman@samf.ac.za from 28th September 2020.
3. Team managers must select and announce the members of each team before the Team paper part of the competition starts. Therefore, you may not decide after the team papers have been written that you want to exchange learner x (team A) with learner y (team B), because learner y has obtained a better individual result.
4. It is reasonable to expect that a team should represent a regional /centre formation and that efforts should be made to be inclusive – in the sense that children in the same geographical area should have had an opportunity to make the team. Individual schools are discouraged to participate as a single team. Organisers should liaise with other schools in their area and enter a team on behalf of their region/area/district.
5. **A region/centre will run the examination from 10:00 until 13:00.** Those regions/centres that write should collect all question papers and scrap immediately after each paper is written, and not announce correct answers or discuss any of the problems in any way.
- If a centre selects to do the Team Competition **online**, the time is fixed from **10:00 – 12:30**.

6. The first test is a one-hour individual problem paper, consisting of 15 problems in multiple-choice format.
